MRCS201

MediaRange 3-way protective contact power strip with increased contact protection, 45° socket arrangement, 3.680W max., 1.4m cable, white

Our power strips provide a practical and flexible solution for everyday power distribution. They are suitable for connecting multiple electrical devices to a single wall socket and are commonly used in home and office environments.

Depending on the model, our power strips offer different numbers of socket outlets as well as optional features such as an integrated on/off switch for convenient control of connected devices. An angled socket arrangement can also help accommodate larger power adapters more efficiently.

This 3-way power strip with increased contact protection provides a safe and practical solution for powering multiple electrical devices from a single wall socket. It is designed for everyday use

in home and office environments.

Featuring a 45° angled socket arrangement, the power strip allows efficient use of space, even when using larger power adapters. The protective earth design ensures reliable and safe power distribution.
