MRMA140

MediaRange Smart Tracker / Item Finder, suitable for Android and Apple devices, 2-Pack

One Finder Tag for All Devices

Misplaced keys, bags or other important belongings can quickly become a source of frustration. The MediaRange Item Finder helps you keep track of your valuables and locate them when needed. Simply attach the tracker to frequently used items and use your preferred location network to find them via your smartphone.

The MediaRange Item Finder is certified for use with both the **Apple Find My network** and the **Google Find Hub network**. During initial setup, users can select their preferred network. However, the devices cannot operate on both networks simultaneously. Once a network is selected, the other is automatically disabled. To switch networks, users must perform a factory reset on the device.

Featuring a compact and lightweight design, IP64-rated dust and splash protection and a replaceable CR2032 lithium coin cell, the MediaRange Item Finder is a practical companion for everyday use. An integrated acoustic signal helps locate nearby items, while the selected location network can assist in finding items that are outside direct communication range.

APPLICATIONS

Package Contents

- 2× Item finder (SKU: MRMA140)
- 2× CR2032 lithium coin cells, 260 mAh (pre-installed, SKU: MRBAT132)
- 2× Key chains
- User manual and safety instructions

Notes

Please read the user manual and safety instructions carefully before use. To use the tracker, a compatible Apple or Android device is required. The Apple Find My network and Google Find Hub network are operated independently. Only one network can be active on the device at a time. To switch between networks, the device must be reset to factory settings and configured again. Battery life, communication range and performance may vary depending on usage, environmental conditions, device configuration and network availability.

*Based on internal tests. Actual performance may vary depending on operating conditions and surrounding environment.
